[0.0s - 5.3s] **SPEAKER_04:** Okay, let's get started. Thanks everyone for joining me. Today's agenda is the

[5.3s - 8.4s] **SPEAKER_04:** sprint review, the log involved, and next month's placating push.

[8.4s - 11.2s] **SPEAKER_03:** Yusuf, can you give us your back-end updates?

[11.2s - 16.9s] **SPEAKER_03:** The API factor is finished. The mental left is the catching layer, which is

[16.9s - 25.4s] **SPEAKER_03:** improving response times by around 40%. I just need to finish the test.

[25.9s - 32.3s] **SPEAKER_03:** You just did any blockers? No, just about two more days of work.

[32.3s - 37.3s] **SPEAKER_02:** I also finished the new hunt body mock-ups. I reduced the flow from five

[37.3s - 41.2s] **SPEAKER_02:** screens to three and moved the permissions request later, so it feels less

[41.2s - 47.2s] **SPEAKER_01:** overwhelming. I reviewed them. They look great, but the skip and continuous

[47.2s - 52.1s] **SPEAKER_01:** buttons on the second screen are too close together. I nearly tapped the wrong

[52.5s - 57.6s] **SPEAKER_01:** Good catch, I'll fix the spacing today. Perfect, let's make that change before

[57.6s - 63.6s] **SPEAKER_01:** development starts. One more thing, the login bug is still at me. Some users are

[63.6s - 71.6s] **SPEAKER_01:** getting logged out after about ten minutes. I think it's a talking

[71.6s - 76.2s] **SPEAKER_03:** refresh issue. I can prioritize it before the catching mark. Great, let's do that.

[76.2s - 81.1s] **SPEAKER_00:** From marketing side, I would rather delay the announcement until the login issue is fixed.

[81.3s - 85.3s] **SPEAKER_00:** We don't want to attract new users. Why what is this? Why that is still happening?

[85.3s - 89.3s] **SPEAKER_04:** Agreed, Ibrahim. Please move it to next week. We will do.

[89.3s - 93.3s] **SPEAKER_00:** I will also prepare a short list of the key improvements for the launch post.

[93.3s - 98.3s] **SPEAKER_02:** I'll send you a screenshot of the new on-body flow. Thanks, that's your help.

[98.3s - 104.1s] **SPEAKER_04:** Perfect, so Yusuf tackles the login bug first. Kajal updates the design.

[104.1s - 108.1s] **SPEAKER_04:** My arm retests the fix and Ibrahim prepares the launch materials. Anything else?

[109.1s - 110.1s] SPEAKER_04: Nothing from me.

[112.1s - 113.1s] SPEAKER_04: Nothing else.

[114.1s - 118.1s] SPEAKER_04: All set. Great, thanks everyone. See you next week.
